OVERVIEW AND COMPONENTS

Home Page (desktop)

Simple intro - leads to about page (hover icon). Nav bar with social links and name to navigate home. Hamburger menu on top right. Basic and easy to follow

ALLEN LIEU.

ABOUT ME

My name is Allen Lieu and I am currently a student at Coder Cademy studying web development.
I am from Sydney and I am looking forward to join the tech industry when I graduate.
I enjoy long walks, gaming, and improving on my coding experience. I am always developing my skills and still learning more languages.

Check out my blog to follow what I get up to!

About Page (Ipad)

Single page layout - Image and icons. Text and button that leads to Blog page(hover icon). No scrolling required - Icons have name of language on it.

```

<html lang="en">
  <head></head>
  ...<body> == $0
    <!-- Top Navs -->
    <nav id="top-navs"></nav>
    <!-- Main Content -->
    <div class="blog-container"></div>
    <!-- Copyright Declaration -->
    <footer id="main-footer"></footer>
</body>
</html>

```

Blog Page (mobile)

Scroll from most recent to older blog posts - similar to a Facebook feed. Images and text fit 100% width of screen

Projects Page (mobile)

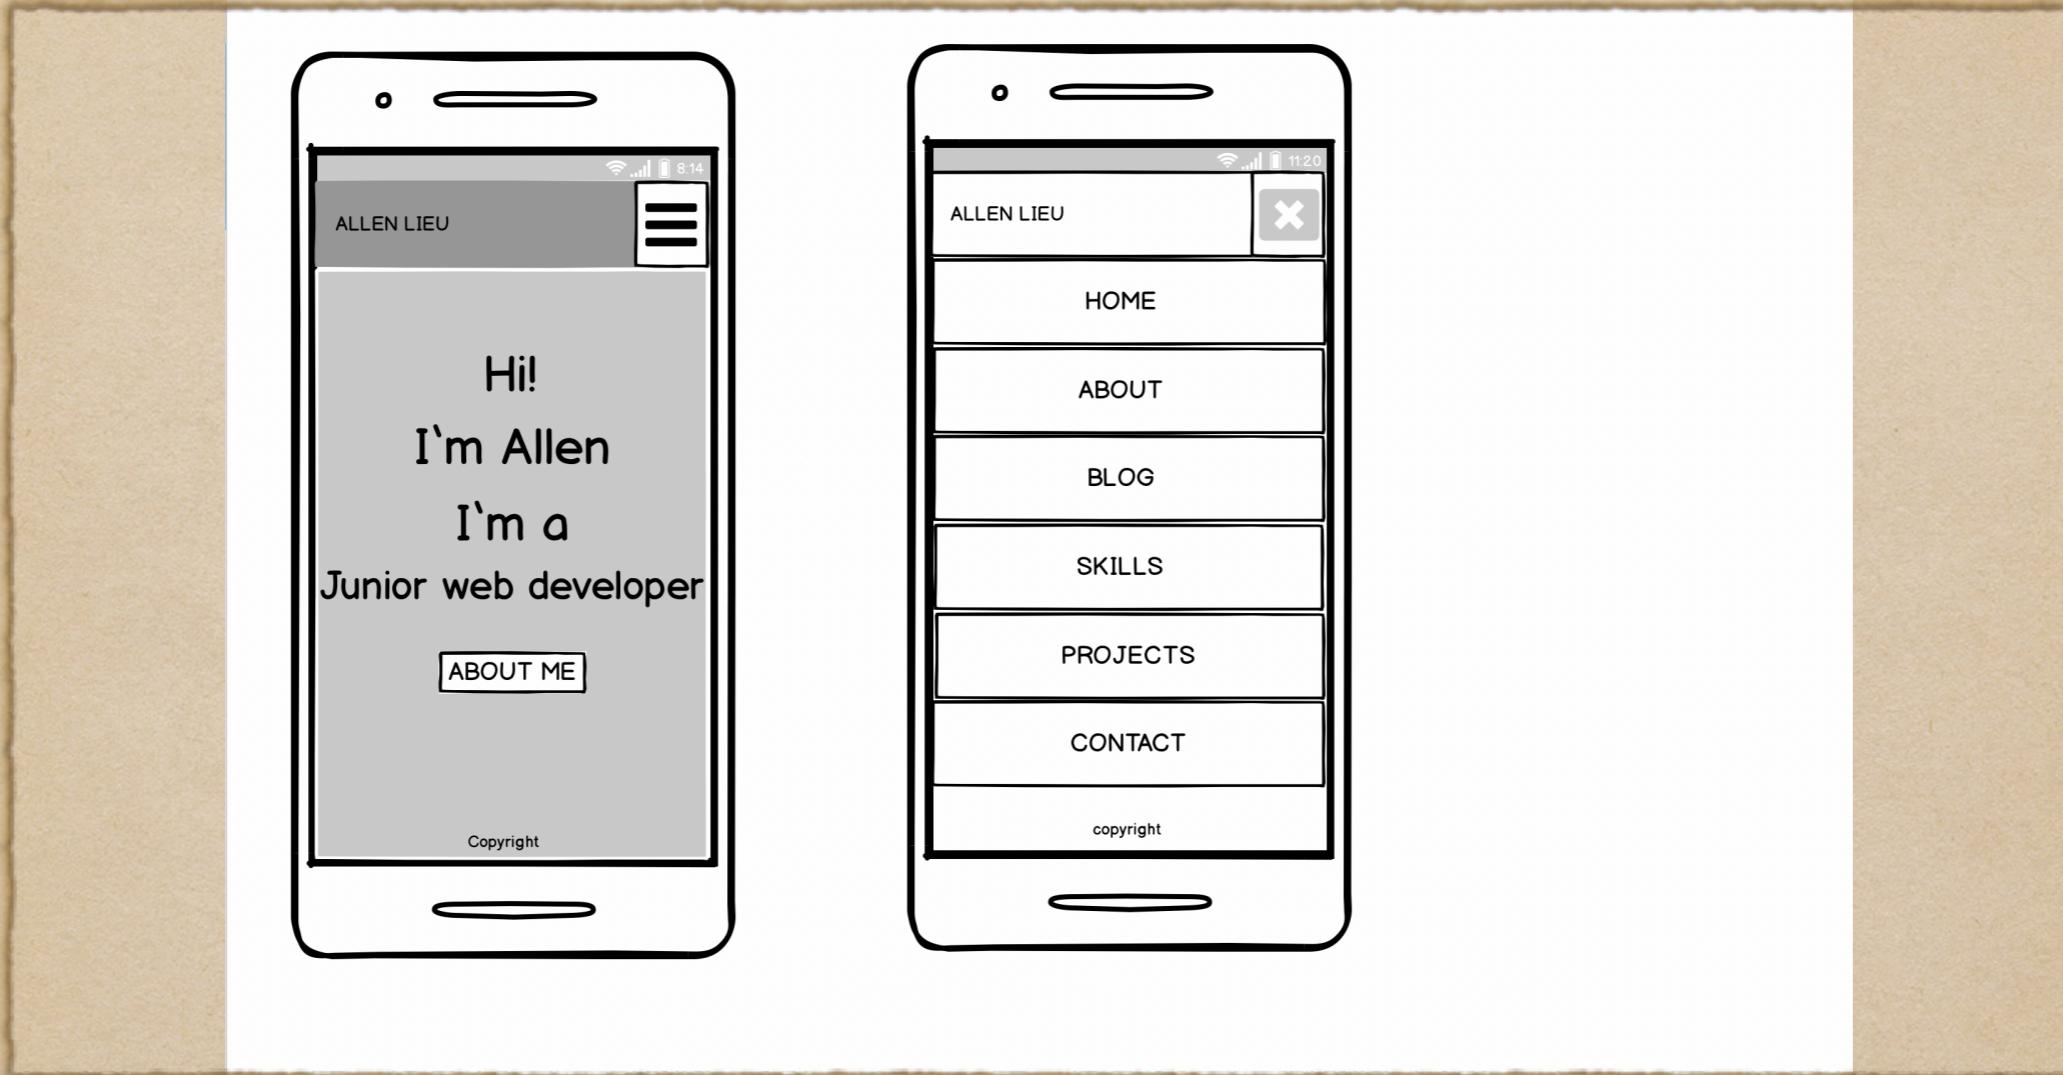

Same structure as Blog. Hamburger menu in use - overlays the screen and animates to X to close.

Contact Page (mobile)

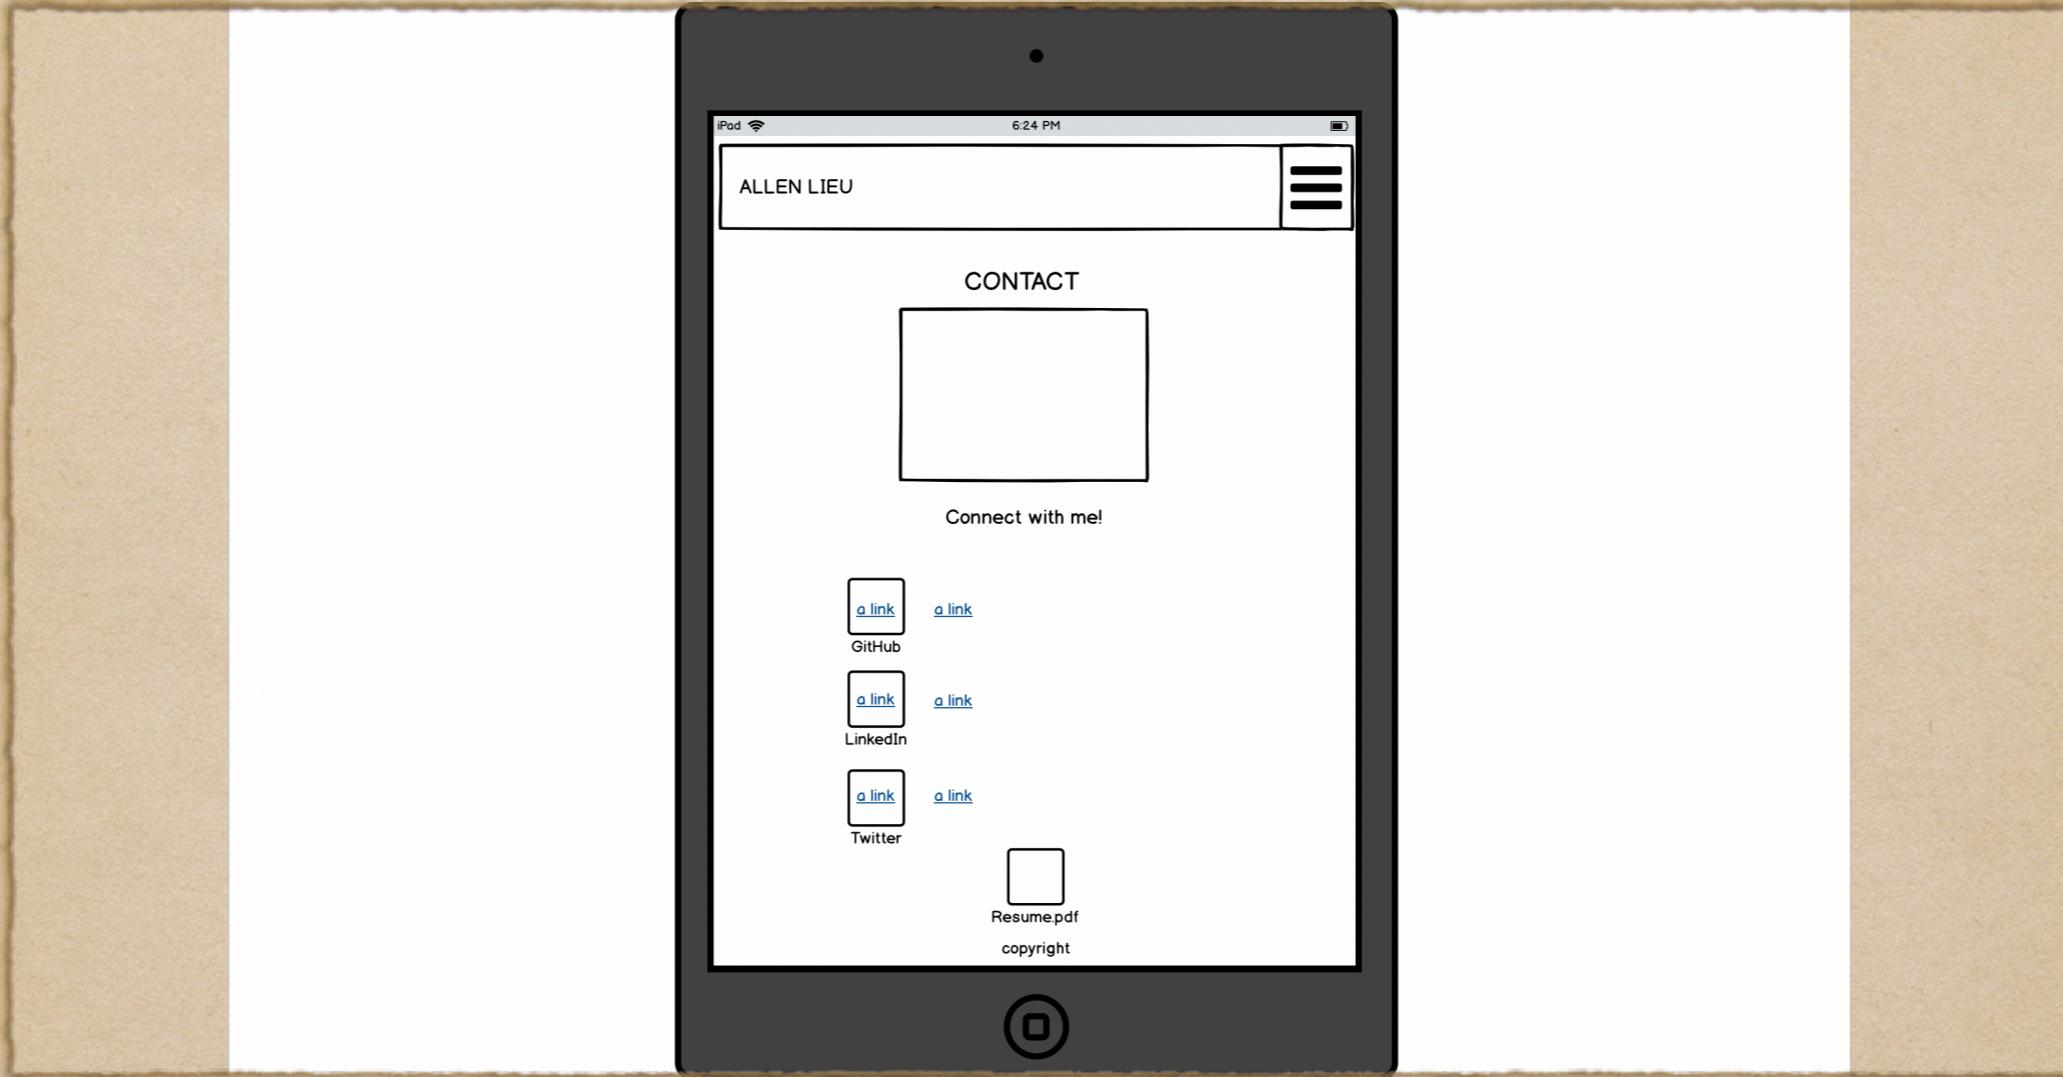

Single page - all content is there and hard to miss.
Resume link stands out with a bright colour

WIREFRAMES AND
MOCKUPS

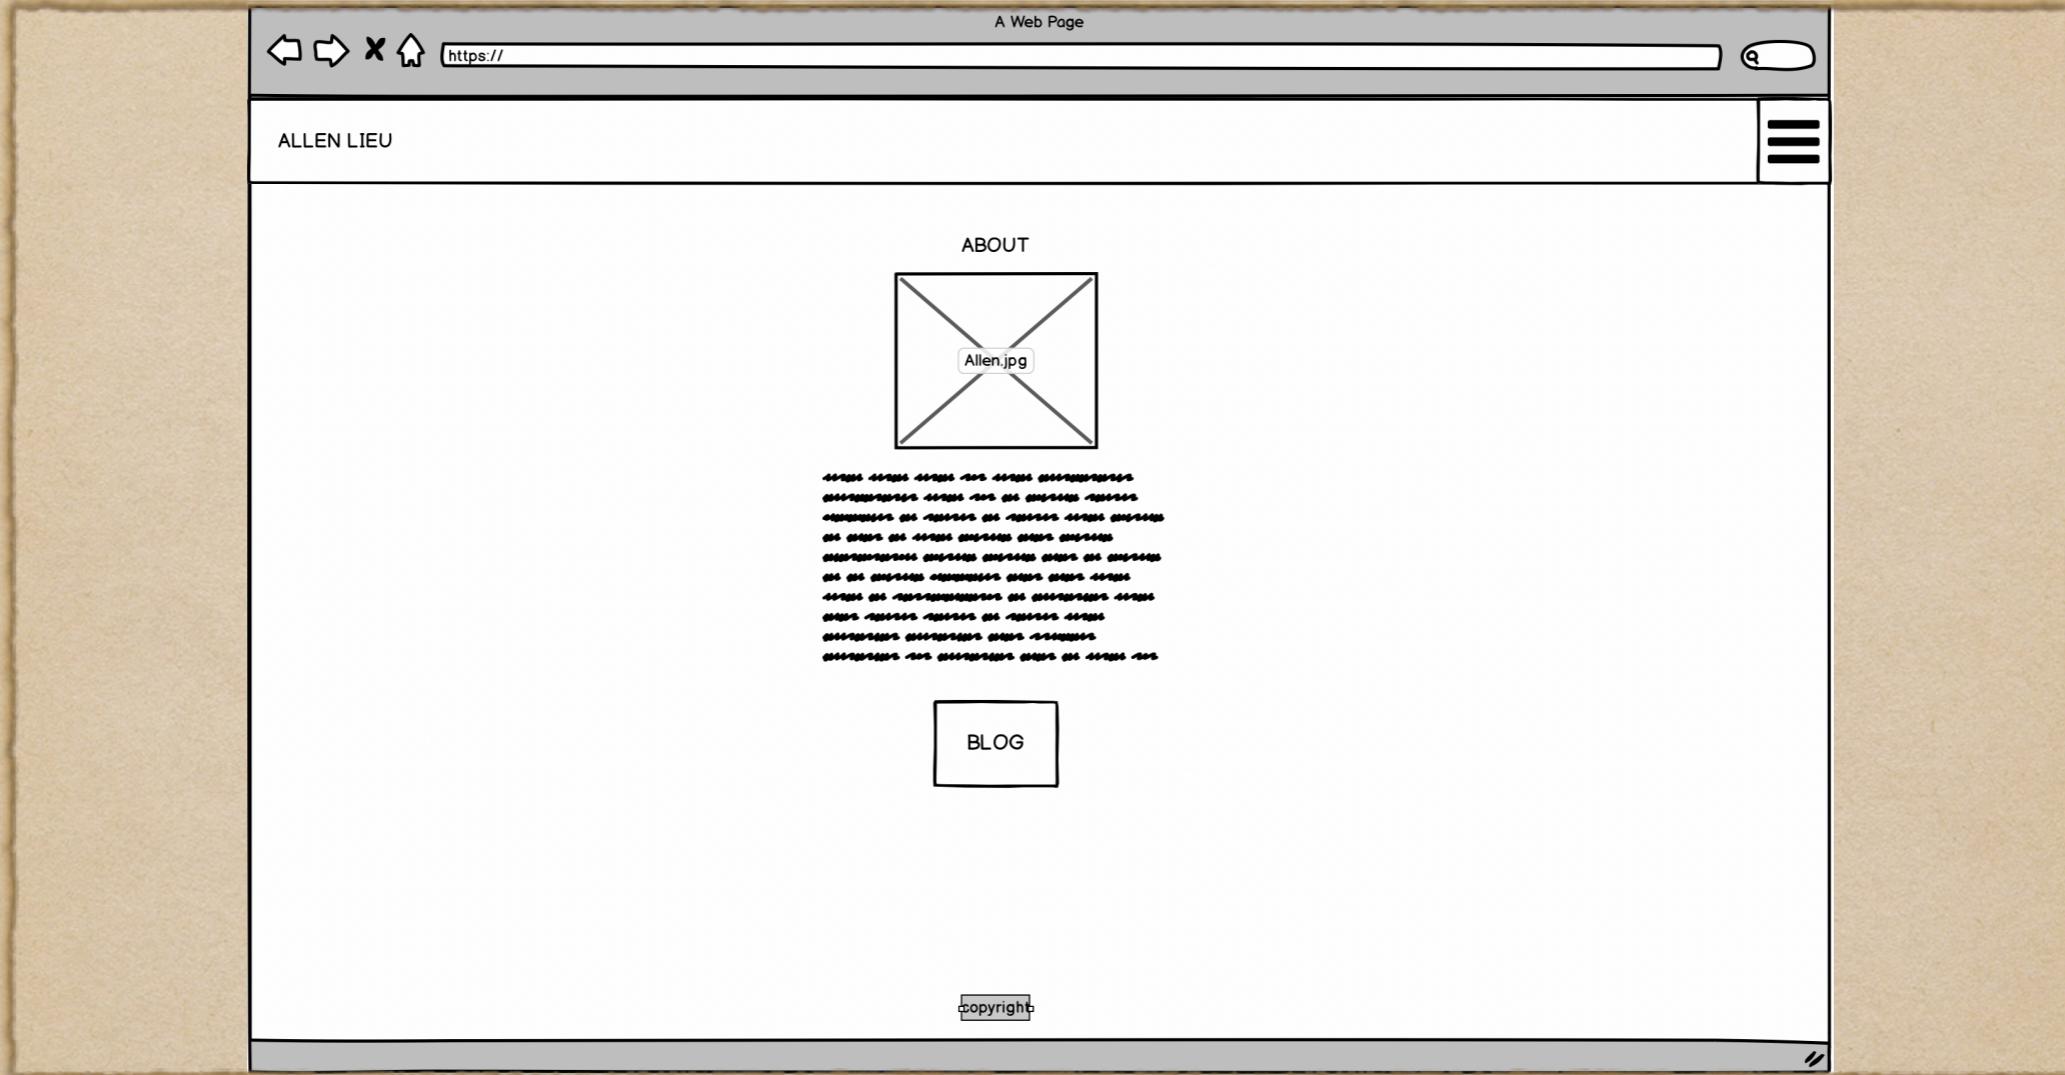

Home Page (mobile)

Simple layout + hamburger menu. Implemented social icons into nav bar halfway through assignment

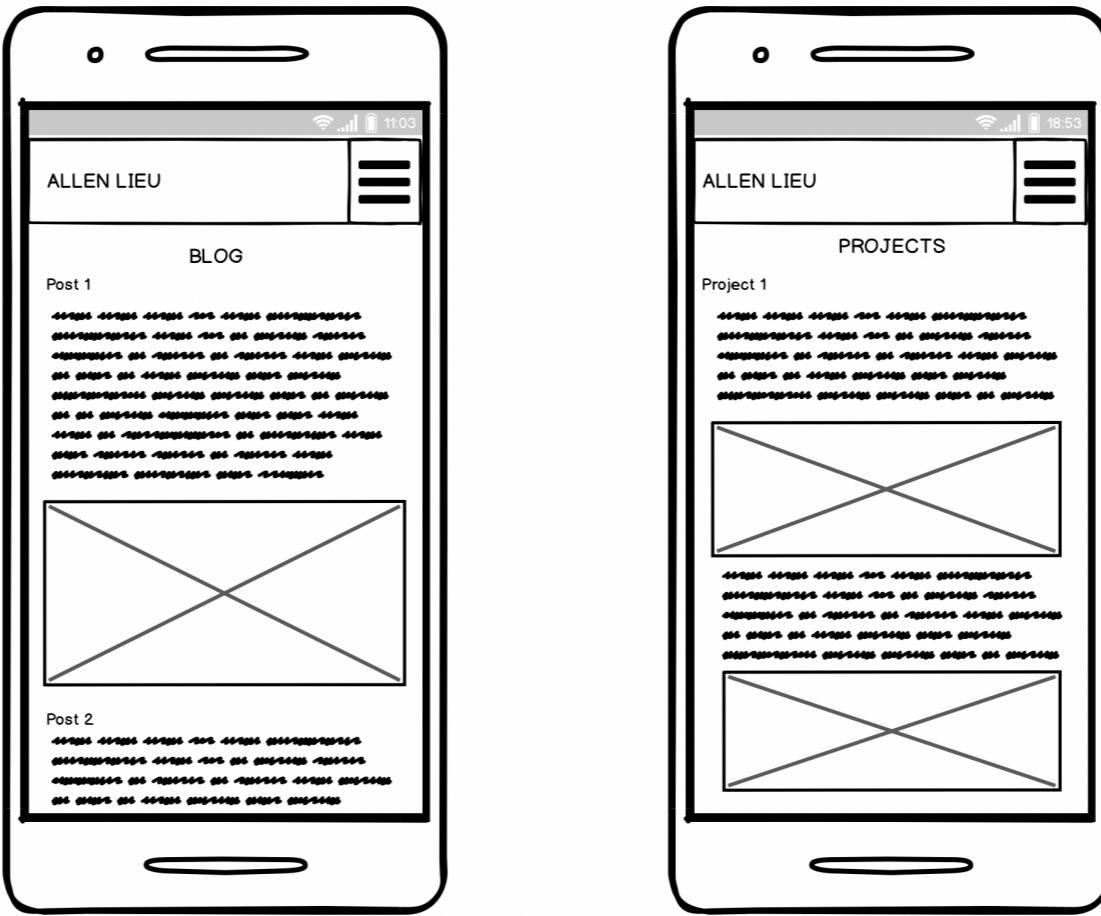

Contact Page (Ipad)

Moved social links to nav bar to keep consistent across all pages. Background image added. Message for resume instead of icon as it can be missed.

About Page (desktop)

Background image added. Decided to add language icons below blog button link. Simple layout - no scrolling

Blog/Projects Page (mobile)

Scroll down from most recent to last. Simple layout with title followed by info/text and images.

Challenges/Issues

- ◆ Learning and implementing same time can take a long time. (socials, icons)
- ◆ Playing around with html and css elements
- ◆ Spending too much time on trying to make a page perfect
- ◆ Frustration with being unable to implement some things the way I wanted
- ◆ Deciding on what to work on next or fix something
- ◆ Focusing to learn how to find/implement what I want

Favourite Parts

- ◆ Designing the pages
- ◆ Hamburger menu with css
- ◆ The top nav bar
- ◆ Finding/adding cool images from unsplash
- ◆ Implementing code I have been trying to figure!
